

The 7th Nuclear Power Technology Lectures
at Hanoi University of Technology (HUST), Vietnam

JICC organized the 7th Nuclear Power Technology Lecture for Hanoi University of Technology (HUST) in Vietnam jointly with the International Nuclear Energy Development of Japan (JINED). On November 25, 2025, the opening ceremony was held followed by the first-day lectures.

<Background/Objectives>

In response to a request from the Vietnam Atomic Energy Agency (VINATOM), JICC and JINED have been delivering nuclear power technology lectures at HUST, and this year was the seventh occasion on which the event was held.

<Details>

The Counselor of the Embassy of Japan in Vietnam, the President of HUST, the Vice President of VINATOM, the COO of JINED, and JICC delivered remarks in the opening ceremony.

The course consisted of intensive lectures over two weeks. Following the opening ceremony, the first day of the course was dedicated to three lectures; namely, [1] Overview of Nuclear Power in the World and Current Status of NPPs in Japan (JICC), [2] Introduction of Nuclear Power Plant (JINED), and [3] Radiation and Radioactive Waste Management (Central Research Institute of Electric Power Industry).

<Results>

In the opening ceremony, the Vietnamese side expressed their appreciation for the course for the seventh year, which has been undertaken through an all-Japan collaborative effort. Approximately 40 students enthusiastically attended the event making it a lively start.
