

On-Site Seminar in Warsaw, Poland

JICC, in collaboration with the Polish Ministry of Energy (MoE), held a local seminar in Warsaw, Poland, on September 22, 2026.

<Background / Objectives>

As part of an international cooperation project to develop the infrastructure for nuclear power generation in Poland, and following consultations with the Polish MoE, JICC held a local seminar in Warsaw, Poland, on the topic of “Front-End Nuclear Fuel Procurement and the Supply Chain.”

<Details>

Approximately 40 experts from both Poland and Japan participated in the seminar. Presentations on “nuclear fuel procurement” from their respective perspectives were given by stakeholders—including the Polish Ministry of the Interior (MoI), the Polish National Atomic Energy Agency (PAA), and Polskie Elektrownie Jądrowe (PEJ)—who were invited by the Polish MoE. From the Japanese side, presentations were given by the Agency for Natural Resources and Energy (METI) on energy policy, by Hitachi GE Vernova on nuclear fuel procurement, and by the Japan Atomic Power Company on fuel handling at nuclear power plants. A constructive exchange of views took place during a panel discussion featuring experts from both countries.

<Results>

Ambassador Extraordinary and Plenipotentiary Kono of the Japanese Embassy in Poland delivered the opening remarks. Through presentations on “nuclear fuel procurement” by experts from both countries, as well as a fruitful exchange of information, the event contributed to strengthening the robust relationship between Japan and Poland in the field of nuclear power generation.

Scenes from the Seminar

The event was featured on the MoE's LinkedIn page and the embassy's website.
